Applicant believes that this combination should be allowable. Applicant has also added new dependent Claim 84, introducing the septa cap in combination with the seals having a central membrane portion.

Applicant has also added new independent Claim 85, adding the "membrane central portion" to at least one of the seals of the combined support platform and dual-opening sample container. Applicant has also added new dependent Claim 86, introducing the septa cap in combination with the seals having a central membrane portion to the combined support platform and dual-opening sample container.

Applicant added new Claims 83-86 to more distinctly claim and particularly point out the subject matter that he considers the invention. No new matter has been added.

Based upon the previously submitted Response of January 19, 2006 and the present Supplemental Response, Applicant urges that the application is now in condition for allowance. Enclosed please find a credit card authorization in the amount of \$300 as additional fee required for new Claims 83-86.

Respectfully submitted,
